Personal profile

I'm a driven person met as strong points communication, professional organization and correctness. I already have several years of experience with working in different labs and have worked with many devices and learned a lot of technical skills. I'm a person who always wants to keep learning as much as possible. Besides this I like responsibility's, at my current job I'm a first aid member, in the first intervention team and help in the HSE group. Currently I'm looking for a long-term job closer to home
